COCO - AC-1000 MAINS SOCKET SWITCH

Mains socket switch (1000 Watt) with 6 memory addresses. Suited to turn lighting or devices on/off wirelessly with a COCO transmitter of your choice. Can be placed in any indoor socket.

Use the AC-1000 mains socket switch to turn your lights or devices on/off wirelessly by using a COCO transmitter of your choice, e.g. a remote control a wireless wall switch (see the compatibility overview). The AC-1000 has a subtle integrated green LED-indicator that complements the receiver's modern design. The receiver has an electronic memory with 6 memory addresses, which means you can use up to 6 different COCO transmitters to control the receiver.
